

AMIX Zinc is a concentrated foliar nutrient solution formulated to contain the zinc and sulphur elements beneficial to plant growth, crop development, crop quality and yield when applied as a properly timed foliar spray or seed treatment.

AMIX Zinc is intended to be used as a foliar treatment in crop production programmes. It will generate Yield increases even in the absence of deficiency symptoms.

Type:

AMIX – Single Micronutrient - Amix Zinc (Zn 10%)

Features:

- Promotes active uptake into the crop – unlike most trace elements that rely on passive absorption (request presentation for full details)
- Low application rates – economical to use
- Improved activity in low temperatures – can be used earlier in the spring
- Adjuvant effect improves pesticide efficacy e.g. fungicides
- Reliable in all conditions
- Crop safe -reduced leaf scorch

Product Specs:

Appearance:

Dark brown Liquid

Typical Analysis:

Zinc (Zn) : 120 g/L

Crop Types & Application rates:

For use in all cereal crops, maize, potatoes and root crops, from the 3-leaf stage of the crop until 4 weeks before harvest.

Dosage should be appropriate to the level of deficiency symptoms and crop biomass.

1-2 l/ha in not less than 100 l/ha water

Start in autumn or early spring with 1.0 l/ha at the 3 to 5 leaf stage, and increase up to the full 2.0 l/ha application rate when canopy is established.

Mixing & Spraying:

Enhancing effect improves pesticide efficacy e.g. fungicides

Reliable in all conditions

Crop safe -reduced leaf scorch

Compatibility:

Amix Zinc is physically and chemically compatible with a wide range of agrochemical products.
