

Greenkeepers Solution Cast Away Worm deterrent and soil penetrant

GS Cast Away is a unique combination of nutrient materials that have been clearly shown to reduce worm-cast levels on sports turf.

Close scientific evaluation has shown that this new product does not kill worms or reduce populations, but does deter worms from travelling through treated soils.

GS Cast Away is unique in using a surfactant system that moves the nutrient into the upper soil structure and fixes it there, providing good persistence of deterrent effect until breaking down to natural nutrients absorbed by the plant roots.

GS Cast Away can be used with absolute safety from first tiller formed on new seeds at low rates of application, and year round on established turf.

Product Specs:

Analysis: More than 5% amino nitrogen
More than 15% organic sulphur

Application rates:

Apply GS Cast Away at a maximum single rate – 20L per min 250L of water per hectare.

Or a recommended programme of 7L per min 250L of water per hectare application, every 10 to 20 days will produce best results.

Cast Away - Summary

Product Application Rate	7-20 L/ha
Pack size	10 litre
Water Rate	250 L/ha

Compatibility:
