

Greenkeepers Solution MONSOON is a blend of medium and low solubility surfactants derived from APG and coconut oil blended with a super wetter for the optimum cure and prevention of localised dry spots.

This triple mode of action gives full leaf coverage, combined with leaf retention to prevent run-off, optimising and promoting leaf penetration.

GS Monsoon will aid with the wetting of the heavy thatch and when used regularly will help you eliminate localised dry spots.

Developed with respect for the environment, GS Monsoon is fully biodegradable in the soil profile and is guaranteed not to harm beneficial soil microbes.

Features

- Improves spray coverage even of the waxiest of leaves
- Superior contact with the target
- Rapid penetration of problem dry areas
- Complements environmentally sensitive turf management programmes
- Fully biodegradable in the soil profile

Product Specs:

Contains:

APG, Dipropionate (anionic surfactant), Glycol, Siloxane

Application rates:

Use GS Monsoon at a rate to give 0.2% dilution in the final spraying water volume.

Season long application 40L/Ha in 800 litres of Water

Maintenance Control 20L/Ha in 800 litres of Water every 4-6 weeks through the growing season. Spot / Curative Treatment as required 10-20L/Ha in 800 litres of Water

When used in conjunction with Mossgard Z - 1 Litre per 30 litres of Water to treat 500m²

Monsoon - Summary

Product Application Rate	20-40 L/ha
Pack Size	10 Litre
Water Rate	800 L/ha
