

Greenkeepers Solution Mossgard Z is a deterrent for Moss growth, in a NON-Staining formulation and environmentally benign penetrants.

GS Mossgard Z can be used in a wide range of amenity solutions wherever problematic moss growth occurs.

GS Mossgard Z provides Amenity areas with foliar and root-absorbed Iron, Zinc and Copper and has been observed to reduce Moss infestations.

Features:

- Can also be used on hard surfaces
- Should be used as part of a programme of treatments

Type: Moss Deterrent

Typical Analysis: Iron (Fe) 4.0% w/w Copper (Cu) 2.5% w/w Zn (Zn) 4.2% w/w

Application rates:

Apply GS Mossgard Z at a rate - 20 per 30L of water to treat 500m² on grass
100mls in 10L of water to treat 100m² on hard surfaces.

For best results make at least two applications, one month apart.

Ideally on turf always mix with 1L of GS Monsoon Wetter per 30L of Water

Mossgard Z - Summary

Grass & Turf Application Rate	6 L/ha
with Monsoon Wetter	20 L/ha
Water Rate	600 L/ha

Hard Surface Application Rate	10 L/ha
Water Rate	100 L/ha

Compatibility: **GS Mossgard Z** should be applied as advised by a competent agronomist to supply Iron and Copper and stop the build up of Mosses.
