

Stimul8 stimulates strong healthy plant growth with increased disease tolerance.

Stimul8 is a source of phosphorus acid, phosphite, and other biostimulants which have been shown to provide increased tolerance to environmental stresses under certain conditions.

Stimul8 is systematically absorbed plant stimulant and fertiliser combined with natural resist disease.

Stimul8 aids the production of strong healthy turf more able to naturally resist disease.

Features:

- Increases biochemical plant defences
- Regulates cell water content and rate of cell growth
- Betaines – Relieves drought and frost stress, stimulates health growth

Typical Analysis: Nitrogen (N) 2.6% w/w Phosphorus (P₂O) 7.1% w/w
Potassium (K₂O) 5.4% w/w

Application rates:

Sports Turf : Apply 2.5L/Ha in a minimum of 200 ltrs of water

Autumn Applications: Apply 3 applications starting in late September / early October approximately 4 weeks apart.

Spring Applications: Apply just before the commencement of spring growth, followed by a further application 4 weeks later.

Stimul8 - Summary

Product Application Rate	2.5 L/ha
Pack Size	5 Litre
Water Rate	200 L/ha
